

EU AI Act Compliance Report - Hiring AI System

Automated Compliance Auditing Report

Project Information:

Risk Classification:	HIGH_RISK
Overall Status:	CRITICAL_GAPS
Compliance Score:	35/100
Estimated Timeline:	3-4 months
Date Generated:	2026-06-28

1. Executive Summary

This compliance report evaluates the hiring AI-powered CV screening tool against the obligations set out in the European Union Artificial Intelligence Act (EU AI Act). Based on the system description and user response checklist, the system has been classified as a High-Risk AI system under Annex III (HR4 - Employment, recruitment, and worker selection). Consequently, it is subject to the stringent obligations detailed in Chapter 2 of the Act.

Our audit has identified several critical and major compliance gaps that must be addressed before the system can be legally placed on the market or put into service. Critical gaps were identified in the areas of Risk Management (Article 9), Data Governance (Article 10), and Human Oversight (Article 14). Specifically, the lack of a documented risk management framework, incomplete training data governance, and missing human override capabilities constitute critical compliance failures.

Immediate remediation is required to bring the system into compliance. The provider must establish a risk management process, formally document training datasets, draw up comprehensive technical documentation, and implement robust human oversight controls. Implementing these recommendations is estimated to take approximately 3-4 months, after which a full conformity assessment must be performed.

Compliance Score: 35/100

Overall Status: CRITICAL_GAPS

2. Priority Action Plan

2.1 Critical Action Items (Priority 1 - Immediate Action Required)

1. Establish and document a comprehensive risk management process to continuously identify and mitigate risks. [Article: Article 9] (Deadline: 1 month)
2. Implement rigorous data governance policies and document bias analysis for training, validation, and testing datasets. [Article: Article 10] (Deadline: 1 month)
3. Design and integrate mechanisms for effective human oversight, including override and interruption options. [Article: Article 14] (Deadline: 2 weeks)

2.2 Major Action Items (Priority 2 - High Priority)

1. Compile complete and detailed technical documentation demonstrating compliance with all obligations under Chapter 2. [Article: Article 11] (Deadline: 2 months)
2. Ensure operations are transparent to deployers and draft clear, comprehensive instructions for use. [Article: Article 13] (Deadline: 1 month)

2.3 Minor Action Items (Priority 3 - Recommended)

No minor action items identified.

3. Passed Compliance Checks

- Conformity Classification (Article 6) - High-risk tier correctly identified.
- Accuracy, Robustness and Cybersecurity (Article 15) - Partial documentation and measures in place.

Disclaimer: This compliance report is generated based on the information provided by the user and does not constitute formal legal advice. Compliance with the EU AI Act requires detailed legal and technical review. The providers remain fully liable for ensuring their systems comply with all applicable regulatory frameworks.
